I would like to thank those individuals who submitted records for the first printing of this chart and since then for the updates. Especially, I wish to thank Bill Walker for giving me a printout of records dating back to 1946. His records are very comprehensive and include occurrences by season and numbers of individuals seen. Also, thank you to Jacques Bouvier for organizing all the sightings during his tenure as President of the Pembroke & Area Bird Club and during the years when he wrote the weekly bird column for The Advertiser-News, now written by Ken Hooles. Some records seen here are from reports submitted by Jacques for publication in American Birds.
